INTRODUCTION

- In this application there have two panel – Admin and student panel.
- Each user will have different permissions.
- Admin can update student information, course details and assigning courses to students.
- Students can check available courses and join the selected courses.
- Students from any location can take the course and complete it.
- This application is web based application which can save time of students.

OBJECTIVES

i. Provide Accessible Education: Offer diverse courses that are easily accessible to learners worldwide, breaking down geographical barriers to education.

ii. Facilitate Flexible Learning: Enable learners to study at their own pace and convenience, accommodating busy schedules and varying learning styles.

iii. Promote Lifelong Learning: Foster a culture of continuous learning by offering courses that cater to various interests, skill levels, and professional development needs.

iv. Support Skill Development: Help learners acquire and enhance practical skills applicable to their careers or personal interests through interactive and engaging course materials.

v. Track Progress and Assess Learning: Provide quiz and lectures to monitor learners' progress and understanding, and improve their knowledge.

vi. Adapt to Emerging Trends: Stay updated with the latest courses and to continually improve the learning experience and course offerings.

vii. Ensure Customer Satisfaction: Continuously gather feedback from learners to improve course offerings, platform usability, and overall satisfaction.

SCOPE

i. Range of Courses: Define the subject areas and disciplines covered by the platform. This could include knowledge skills (e.g., programming, data science).

ii. Learning Formats: Describe the types of courses available, such as video lectures. Emphasize whether the courses are self-paced or instructor-led.

iii. Accessibility and Technology: Address how accessible the platform is in terms of device compatibility (desktop, mobile), internet requirements, and support for assistive technologies. Mention any special features like mobile apps or offline access.

iv. Support and Community: Discuss the support mechanisms available to learners. Highlight how the platform fosters a sense of community among learners through networking opportunities or group projects.

v. Target Audience: Specify the demographic or professional backgrounds of the learners the platform aims to serve. This could range from students seeking supplementary education to professionals looking for career advancement or individuals pursuing personal enrichment.

METHODOLOGY

i. Course Development Process:
1. Curriculum Design: Collaborate with subject matter experts to design comprehensive and engaging course curricula that align with industry standards and learner needs.
2. Content Creation: Utilize multimedia elements (videos, interactive modules, simulations) to enhance learning experiences. Ensure content is clear, structured, and accessible.
3. Quality Assurance: Implement a rigorous review process to maintain high standards of course content, including peer reviews, expert feedback, and regular updates.

ii. Learning Support and Assessment:
1. Learning Analytics: Utilize data analytics to track learner progress, identify areas for improvement, and personalize learning experiences.
2. Feedback Mechanisms: Students can message if they have any query related to course and they can contact us. Our details are given in Contact Us Page.
3. Support Services: Offer dedicated Learning (e.g., Quiz) to address learning challenges promptly.

TOOLS AND TECHNOLOGIES

Technologies Used :-

1. Programming Language:
- C#

2. Database Management Systems:
- SQL Server

3. Front-End Technologies:
- HTML
- CSS
- JAVASCRIPT

4. Back-End Technologies:
- ASP.NET

5. Database Technologies:
- Entity Framework
